Last night I tried to capture the line of questioning to the extent possible at the CAG Meeting. I've attached a listing of the questions that were posed by CAG members and the public during the actual session. After things started to break up, I was not able to get all of the questions that were being asked by the CAG members to the LWG reps. I also tried to capture a few statements that were made by the public during the session. Needless to say, these notes are a generalized interpretation of specific questions asked and are not verbatim quotes. Hope this helps in the grand scheme of things!
